

Volunteers Needed!

Mission: Enhance Native Aquatic Vegetation in Lake Gaston

Lake Gaston Association is recruiting for our
Habitat Enhancement Project on Lake Gaston

Since 2013, volunteers have worked with the Weed Control Council,

- NCSU Cooperative Extension, NC Wildlife Resource Commission and the Virginia Department of Wildlife Resources

Help repair, build and plant the cages!

Students can receive a letter from NCSU acknowledging volunteer hours!

Fenced in areas, called exclosures or cages, are constructed to protect & develop colonies of native vegetation. The cages protect the newly planted native vegetation from being eaten by herbivores, such as turtles and grass carp. Native vegetation provides habitat for fish and waterfowl, reduces shoreline erosion, replaces invasive plants, anchors sediment and improves water quality.

Tuesday June 21st-9am meet at Granite Hall Shores HOA Boat Ramp

Wednesday June 22nd-9am meet at Poplar Creek VADWR Ramp

Thursday June 23rd-9am meet at Salmons Landing NCWRC Ramp
