

Bruce Johnson

It is with deep regret that the Lake Community has lost a very important person. Bruce Johnson passed this past week. As many will recall Bruce was known as “The Plant Guy”.

He was instrumental in the success of the LGA volunteer group for the vegetation project and the annual full lake survey. He trained many of our volunteers on plant identification for the survey. And he surveyed in some years about 20% of the shoreline himself. It was not unusual to see his small SUV with Kayak on top around the lake to get in the water for something of interest. His value to the survey was felt in recent years when his health prevented his participation.

The Lake Gaston Weed Control Council offers our sincere sympathies for his wife and family. We appreciate his family allowing us the time he spent with us.

RIP Plant Guy
